Provenance Chain™ Network Becomes a GSI Solution Partner

Portland, OR

The Provenance Chain™ Network (PCN) has become a member of the GSI US Solution Partner Program, a designation signifying a commitment to delivering services and solutions that enable quick, efficient and accurate GSI Standards implementation.

PCN's solutions enable trust in commerce through transparency which require the accurate implementation of GSI Standards. Being a member of the GSI US Solution Partner Program will allow us to participate in standards-based education and GSI Community workgroups that will further our ability to help our customers improve supply chain visibility and efficiency efforts. PCN works with customers in GSI US's four focus industries: Retail Grocery, Foodservice, Apparel and General Merchandise and Healthcare and has already begun participating and contributing to the GSI US Supply Chain Optimization workgroup.

Jeff Gaus, Co-founder and CEO of PCN, says, "Building trust in commerce through transparency is the Provenance Chain Network's purpose, and the adoption and use of GSI Standards are foundational to achieving that. We look forward to participating in the GSI community, to extend the PCN's market reach, and to bring more value to trading partners engaged in the discussion and activation of solutions."

About The Provenance Chain™ Network

The Provenance Chain™ Network (PCN) is defining and ushering in a new era of consumer and commercial transparency to satisfy people's fundamental right to know the facts about what they buy, use, and consume. Their vision is to reveal the lifecycle story—the origin, custody, consumption, and conversion—of every product. Their mission is to connect partners to, and lead the operations of, the world's largest, most trusted, open-standards Transparency as a Service (TaaS) platform so people can make the best decisions about the supply chains that serve them.
